

Bo Wang

bo.wang@berkeley.edu | (510) 918-4892 | <https://www.linkedin.com/in/bowang1002/> | Berkeley, CA

EDUCATION

University of California, Berkeley

B.A. in Computer Science; B.A. in Data Science (GPA: 3.8/4.0)

Berkeley, CA

Graduation: May 2027

SKILLS

Coursework: Data Structures, Structure and Interpretation of Computer Programs, Principles & Techniques of Data Science, Linear Algebra, Differential Equations, Multivariable Calculus

Programming Languages: Python, Java, SQL, JavaScript, R, C/C++

Tools & Frameworks: React, HTML, CSS, NumPy, Pandas, Matplotlib, Scikit-learn, Git, VS Code

TECHNICAL EXPERIENCE

AI Software Development Intern - NLP & Retrieval-Augmented Generation

September 2025 - Present

Urban Displacement Project

Berkeley, CA

- Engineering an LLM-powered chatbot with modular APIs for retrieving and summarizing legislative information from Californian housing policy databases, enabling structured responses to user queries.
- Developing scalable web scrapers and automated ETL pipelines to extract and preprocess legal documents from 450+ municipalities with varying formats, implementing error handling and schema validation.
- Tested and optimized chatbot outputs and overall system reliability across policy categories, analyzing strengths and failure modes in misclassifications and refining system design to achieve ~80% overall accuracy.

Course Instructor & Teaching Assistant - DATA 198: Intro to Real World Data Science

August 2025 - Present

UC Berkeley College of Computing, Data Science, and Society (CDSS)

Berkeley, CA

- Organizing and delivering weekly lectures on data science fundamentals to 60+ undergraduate students, covering exploratory data analysis, interactive dashboards, machine learning models, and more.
- Leading discussion sections that enhanced student understanding and provided assistance in completing group passion projects focused on industry applications of Artificial Intelligence (AI) techniques.

Research Assistant - Big Data Processing

September 2024 - June 2025

UC Berkeley Haas School of Business (Prof. Anastassia Fedyk)

Berkeley, CA

- Developed Python scripts that facilitated end-to-end data processing surrounding foreign aid to Ukraine, including dynamic keyword filtering, classification, and normalization of weapon prices.
- Enabled scalable analysis of 1,500+ data entries across 7 categories of aid as defined by international standards.
- One of 19 Berkeley undergraduates whose contributions to relevant datasets were directly cited by the Centre for Economic Policy Research (CEPR) and Economists for Ukraine (Econ4UA).

PROJECTS

Interactive Client Budget Tracker

May 2025

- Implemented a user-friendly financial tracker for Code For Good Cal's executive board within project groups.
- Built frontend authentication and transaction pages using HTML, JavaScript, and DOM manipulation.
- Implemented validation logic and automated error detection, preventing negative deposits or anomalously large withdrawals, ensuring accurate tracking of 100+ historical entries with a linked Excel backend.

Berkeley Restaurant Rating Predictor

March 2025

- Created a Voronoi diagram visualization of selected restaurants in Berkeley from the Yelp Open Dataset, using a least-squares, supervised learning algorithm to predict user-specific ratings.
- Achieved an R^2 average of up to ~0.65 across unique user profiles and trials involving different randomness in k-clustering and subsets of data based on features such as categories and prices.

LEADERSHIP & TEACHING

Data Science Society Hackathon & academic development organizer (130+ students)

August 2025 - Present

Pioneer Academics Alumni advisory board coordinator (1000+ total participants)

January 2025 - Present

NewChannel International Education English teaching assistant (30+ students)

July 2025 - August 2025
